PEERLESS LEVELS Are Popular Sellers

Masons, Plasterers, Carpenters and Bricklayers all use and endorse Peerless Levels.

Because Peerless Levels were designed by practical Bricklayers—men who understand requirements.

They are made right and stay so. Good wood; tongue and groove construction; brass end plates; easily read glasses; solid set and protected vials—these are some of the features that make them popular with all trades.

We intend to maintain their superior qualities and by so doing keep them popular and in demand.

If **you** have never sold Peerless Levels, we'd like to present our proposition to you. We have always endeavored to treat the Dealer right and as Dealers stick to **us**, it proves that the **liberal profit** is not the only reason for selling them.

Write to **us** and we'll write to **you.**

No. 550 BRASS BOUND LEVEL

No. 550 Peerless Carpenter's Level is bound on all four edges. Six glasses, two plumb glasses at each end and two level glass set in Patented Brass Sockets. 24, 26, 28 and 30 in. long.
